23.	Average weekly overtime and ordinary time earnings and hours, Australia	26

..	Technical note — reliability of estimates	27
----	---	----

Coverage

5. The survey covered all Australian and State Government departments and authorities and stratified random samples of local government authorities, non-government hospitals (not subject to payroll tax) and other private employers.

6. Although the sample was not designed to provide estimates of the numbers of employees represented, it has been calculated that the survey was representative of approximately 2,687,000 male and 1,398,000 female wage and salary earners, comprising 1,779,000 males and 1,000,000 females in private employment and 908,000 males and 398,000 females in government employment. The approximate percentages of employees by category are shown in the table below.

7. As parts of the survey were conducted from samples of employers (see paragraph 5 above) the resultant estimates are subject to sampling variability, that is, variations which might occur by chance because only samples of employers were surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. For more details on the reliability of the estimates see the Technical Note on page 27.

Industry classification

8. The industry classification used for the survey was the Australian Standard Industrial Classification (ASIC) described in *Australian Standard Industrial Classification* (Preliminary Edition) 1969, Vol. 1. The table on page 4 shows details of the ASIC industries used in the survey; the abbreviated descriptions used in the tables for some industry groupings are also shown. A comparison of the ASIC industry classification with that used in surveys prior to October 1974 is shown in *Earnings and Hours of Employees, October 1974* (Reference No. 6.40).

At the time of the selection of the sample payroll tax was payable by employers in the States paying more than \$800 a week in wages and salaries (\$400 a week in the Territories). In general, Australian Government bodies, religious and benevolent institutions, public hospitals and other similar organisations are specifically exempted under the Australian and State Payroll Tax Acts.

[illegible]

(a) Less than 0.05 per cent.

ASIC Code

Division	Sub-division	Industry	Abbreviated descriptions used
C		Manufacturing —	
	21–22	Food, beverages and tobacco	
	23,24	Textiles; clothing and footwear	
	26	Paper and paper products, printing and publishing	Paper, printing, etc.
	27	Chemical, petroleum and coal products	
	29	Basic metal products	
	31,33	Fabricated metal products; other industrial machinery and equipment and household appliances	Fabricated metal products; other machinery, etc.
	32	Transport equipment	
	25,28,34	Other (a)	
		Non-manufacturing industries —	
B		Mining	
D		Electricity, gas and water	
E		Construction	
F	46–47	Wholesale trade	
	48	Retail trade	
G,H		Transport and storage; communication	
I		Finance, insurance, real estate and business services	Finance, business services
J,K(b)		Public administration and defence (b); community services	Public administration, etc.
A,L(c)		Other industries (c) (forestry and logging, fishing and hunting, entertainment, recreation, restaurants, hotels and personal services)	Other
		Total (b)(c)	

(a) Includes wood, wood products and furniture (sub-division 25); glass, clay and other non-metallic mineral products (sub-division 28); leather, rubber and plastic products and manufacturing not elsewhere classified (sub-division 34). (b) Excludes defence forces. (c) Excludes agriculture and services to agriculture (sub-divisions 01 and 02) and private households employing staff (sub-division 94).

Comparability of results

9. Similar surveys of *private* employees only were conducted in October in a number of years prior to 1972. They were based on samples of most private employers subject to payroll tax. In 1972, the coverage of the surveys was expanded to include (i) private employees in the Northern Territory and the Australian Capital Territory, (ii) employees in non-government hospitals not subject to payroll tax and (iii) employees of Australian, State and local government authorities. Estimates by *industry* contained in this bulletin are not directly comparable with those obtained from surveys prior to 1974. (See paragraph 8.)

10. The estimates shown in this bulletin reflect differences — between States, between industries and between government and private employment — in (i) the amounts earned and the hours worked for the same occupations, (ii) the occupational structures within

industries, (iii) the industry structure, (iv) the definitions and reporting of managerial, etc. staff and non-managerial employees (see paragraph 18), (v) the level of business activity including the incidence of overtime, etc., (vi) the incidence of incentive, piece-work and profit-sharing scheme payments, and (vii) the degree of implementation of equal pay for sexes, etc. In particular when comparing estimates for private and government employees points (ii), (iii), (iv) and (vii) would seem to be most important.

11. *Employees* refers to male and female wage and salary earners who received pay for the last pay-period in October 1976, but see paragraph 3, page 3.

12. *Private employees* are employees of private employers subject to payroll tax and employees of non-government hospitals not subject to payroll tax.

13. *Government employees* are civilian employees of Australian and State government departments, authorities and semi-government bodies, and of local government authorities.

14. *Adult employees* comprise all employees 21 years of age and over, and employees under 21 years of age who are paid at the adult rate for their occupation. *Junior employees* are all other employees under 21 years of age.

15. *Full-time employees* are those employees who ordinarily worked 30 hours or more a week. Included are full-time employees on short-time, full-time employees who began or ceased work during the pay-period, and full-time employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. Some employees (e.g. air crews, teachers, university lecturers), although paid for a weekly attendance of less than 30 hours, were classified as full-time if they worked the normal scheduled hours for a full week.

16. *Part-time employees* are those employees who ordinarily worked less than 30 hours a week. Employees on short-time who normally worked 30 hours or more a week were classified as full-time employees.

17. For *private employees*, *non-managerial employees* were defined to include minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. They exclude *managerial, executive, professional and higher supervisory staff* who, for private employees, were not further defined. For *government employees*, *managerial, executive, professional and higher supervisory staff* were generally defined as those employees (i) who were ineligible to receive payment for overtime, or (ii) who, although subject to payment for overtime, were in charge of a significant number of employees in a separate establishment (or establishments). The basis of allocation of employees to these two categories may have varied between individual private employers and between employers in the private and government sectors, with consequent effects on survey results. For some occupations in government employment, such as school teachers and doctors, there is no general payment for overtime. In these cases, managerial, etc. staff were determined according to the degree of supervision exercised or in relation to the pay structure of associated administrative employees.

18. *Weekly earnings* refers to gross earnings before taxation and other deductions have been made. It comprises overtime earnings (see paragraph 19) and ordinary time earnings (see paragraph 20). Where

payments are made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual or other leave taken during the specified pay-period; periodical payments under incentive, piece-work, profit-sharing, etc. schemes; commissions; annual or periodical bonuses; etc., one week's proportion of such payments are included. Retrospective payments are excluded.

19. *Overtime earnings* refers to that part of gross weekly earnings (as defined above) attributable to hours paid for in excess of award, standard or agreed hours of work. Overtime earnings were not reported for managerial, etc. staff.

20. *Ordinary time earnings* refers to that part of gross weekly earnings (as defined above) attributable to award, standard or agreed hours of work. Included in relation to these hours are shift allowances, penalty rates, commissions, bonuses and incentive payments, and one week's proportion of payments for annual and other leave taken during the specified pay-period.

21. *Weekly hours paid for* refers to the hours for which payment was made. It comprises overtime hours (see paragraph 22) and ordinary time hours (see paragraph 23). For employees paid other than weekly, hours were converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the specified pay-period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Hours of work were not reported for managerial, etc. staff.

22. *Overtime hours* refers to hours in excess of award, standard or agreed hours of work.

23. *Ordinary time hours* refers to award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours of work, and that part of paid annual leave, paid sick leave and long service leave taken during the specified pay-period.

NOTE. The estimated figures of average weekly earnings contained herein are rounded to the nearest 10 cents, those of average weekly hours paid for to the first decimal place, and those of average hourly earnings to the nearest cent. Any discrepancies between totals and sums of components in tables are due to rounding.

All publications produced by the ABS are listed in *Publications of the Australian Bureau of Statistics* (Reference No. 1.8) which is available free of charge from any ABS office.

SURVEY OF WEEKLY EARNINGS AND HOURS, OCTOBER 1976

Particulars are to be supplied for all employees included on the **Northern Territory Pay-roll Tax return** of the company, firm or person named in the address box on page 3 and who received pay for the last pay-period in October 1976

Particulars (see instruction 2)	Number of Employees (see instruction 5)	Total Weekly Man-hours Paid For (i.e., total for one week for all employees in each category —see instructions 8 and 9) To nearest hour	Office use only	Total Gross Weekly Earnings (i.e., total for one week for all employees in each category —see instructions 10 and 11) To nearest dollar	Office use only
---------------------------------	---	---	-----------------	---	-----------------

(a) Average overtime and ordinary time earnings and hours paid for are averages for all employees represented in the survey.

TECHNICAL NOTE

RELIABILITY OF THE ESTIMATES

As the private sector and local government sector of the survey were surveyed by means of samples (see paragraph 7, page 3), the estimates in this bulletin are subject to sampling variability, that is, variations which might occur by chance because only samples of employers were surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. However, because of the small proportion of government employees who were employed by local government authorities, and the fact that coverage was complete for all other government employees, the effect of this sampling variability on *total government* estimates can be disregarded for most practical purposes.

2. For private employees the estimates obtained from this survey may differ from figures that would have been produced had information been obtained from all private employers. One measure of the likely difference is given by the standard error of the estimates. There are about two chances in three that a sample estimate will differ by less than one standard error from the results which would be obtained from a comparable complete collection, and about nineteen chances in twenty that the difference will be less than two standard errors. The table on page 28 sets out approximate percentage standard errors for average weekly earnings for full-time male and female managerial, etc. staff and non-managerial employees in private employment in each State and Australia.

3. An example of the use of this table is as follows: the estimate of average weekly earnings for adult male full-time non-managerial employees in private employment in Australia is shown in the table on page 7 as \$183.30. The table on page 28 shows the approximate standard error of this estimate to be 0.2 per cent (or

approximately 40 cents rounded to the nearest ten cents). There are two chances in three that a complete collection would give a figure within the range of \$182.90 to \$183.70 and nineteen chances in twenty that the figure would be within the range \$182.50 to \$184.10.

4. The standard errors for the published estimates of average weekly ordinary time earnings and average weekly total earnings, are generally less than 2 per cent. The standard errors for the published figures of average weekly overtime earnings and hours, and for average weekly earnings and hours for part-time employees are generally less than 10 per cent.

5. The percentage standard errors for average weekly ordinary time hours and average weekly total hours are generally much lower than the corresponding figures shown in the table for average weekly ordinary time earnings and average weekly total earnings. In the case of average weekly overtime hours, the standard error percentages approximate those shown for average weekly overtime earnings. It is considered that the percentage errors for total (private and government) employees would generally be lower than those for private employees shown in the table.

6. The imprecision due to sampling variability, which is measured by the standard error, should not be confused with inaccuracies that may occur because of imperfections in reporting by respondents. Inaccuracies of this kind are referred to as the non-sampling error, and they may occur in any enumeration, whether it be a full count or only a sample. Efforts are made to reduce the non-sampling error by careful design of questionnaires and detailed checking of completed returns.
